AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

Belmont Ranch has approximately 448 acres of conventional watermelon, honeydew, and corn. Planting began in February, with harvest starting in June and expected to conclude by mid-October. No field workers were observed during this audit. The growing areas are surrounded by agricultural land and roads. Only synthetic fertilizers are applied at this farm. Irrigation and fertigation are conducted through a drip system using wells or canal water. This audit covered a group of three ranches, four harvest crews, and one packinghouse operating under the same Food Safety Management System (FSMS).

Addendum(s)/Module(s) included in the audit:

Not Applicable

Product information for each product

Product Group/Product Name	Observed Product	Seasonality	Country of destination for product
Honeydew	Observed on the day of audit	From: February To: October	Mexico, United States, Canada
Watermelons	Observed on the day of audit	From: February To: October	Mexico, United States, Canada

CERTIFICATE VALID FROM:
